Lucciano Campassi - ingles

Lucciano Campassi

> I am a software engineering student based in Buenos Aires, Argentina, with a strong passion for technology and cybersecurity from a young age. Alongside my studies, I work as a Cybersecurity IT Consultant, aspiring to become a Pentester or a cybersecurity auditor. I am a hardworking and proactive individual, always eager to learn and improve. I excel in team environments and am dedicated to advancing my skills in cybersecurity.

Coursing University (Cybersecurity engineering)

Universidad Tecnologica Nacional

2023 - 2024

Coursing University (information systems engineering)

2023 - Now

As a Cybersecurity IT Consultant specializing in Identity Management (IDM), I excel in managing Identity and Access Management (IAM) technologies, particularly in NetIQ IDM solutions. With extensive experience in API REST connectors, I seamlessly integrate IAM systems with client environments. Additionally, I leverage my expertise in Linux, alongside fundamental networking and cybersecurity concepts, to ensure robust security frameworks and efficient operations for clients. I also handle tasks related to network system management with NetIQ Access Manager (NAM), enhancing the overall security and efficiency of client systems.

Skills & Technologies

Cybersecurity

- Experience in vulnerability analysis, incident management, and system auditing.

- Knowledge of Blue Team tools for threat detection and response.

- Handling security solutions for monitoring, forensic analysis, and alert management.

- Security assessments using Kali Linux and Parrot OS tools.

Development & Automation

- Proficient in Python for backend development, task automation, and

Modern High School
